

Transponders :

A brief update To those who are New to racing with us at The Scottish Twin Shock Club. We use Mylaps Electronic Timing to record our Race Results . In brief you will need a Transponder to record where you finish, points scored etc, for your Championship.

No Transponder = No Trophy / No Info / No Points !!!

You can race without one No Problem but we will not be able to give you any info at all on where you finish in the race.

Please see below websites where these can be purchased from. There are different subscription packages available to suit all but please make sure you purchase the correct Transponder for Motocross !!

**HS Sports : <http://www.hssports.co.uk>
or direct from Mylaps.com (import charges may now apply)**

MyLaps TR2 MX Transponder Pack with a 1 Year subscription is appx £90 inc. postage .

Once you have received your Transponder make sure you Register & Activate it via the software download then just let us know your Transponder number and we will update the system, simple !!

Hope this info is helpful .

Do not wait until the last minute to purchase one as race day is busy enough without trying to register transponders so you have been warned.

Hope this info is helpfull

Cheers..
